

**What is the
“inside-out”
Librarian?**

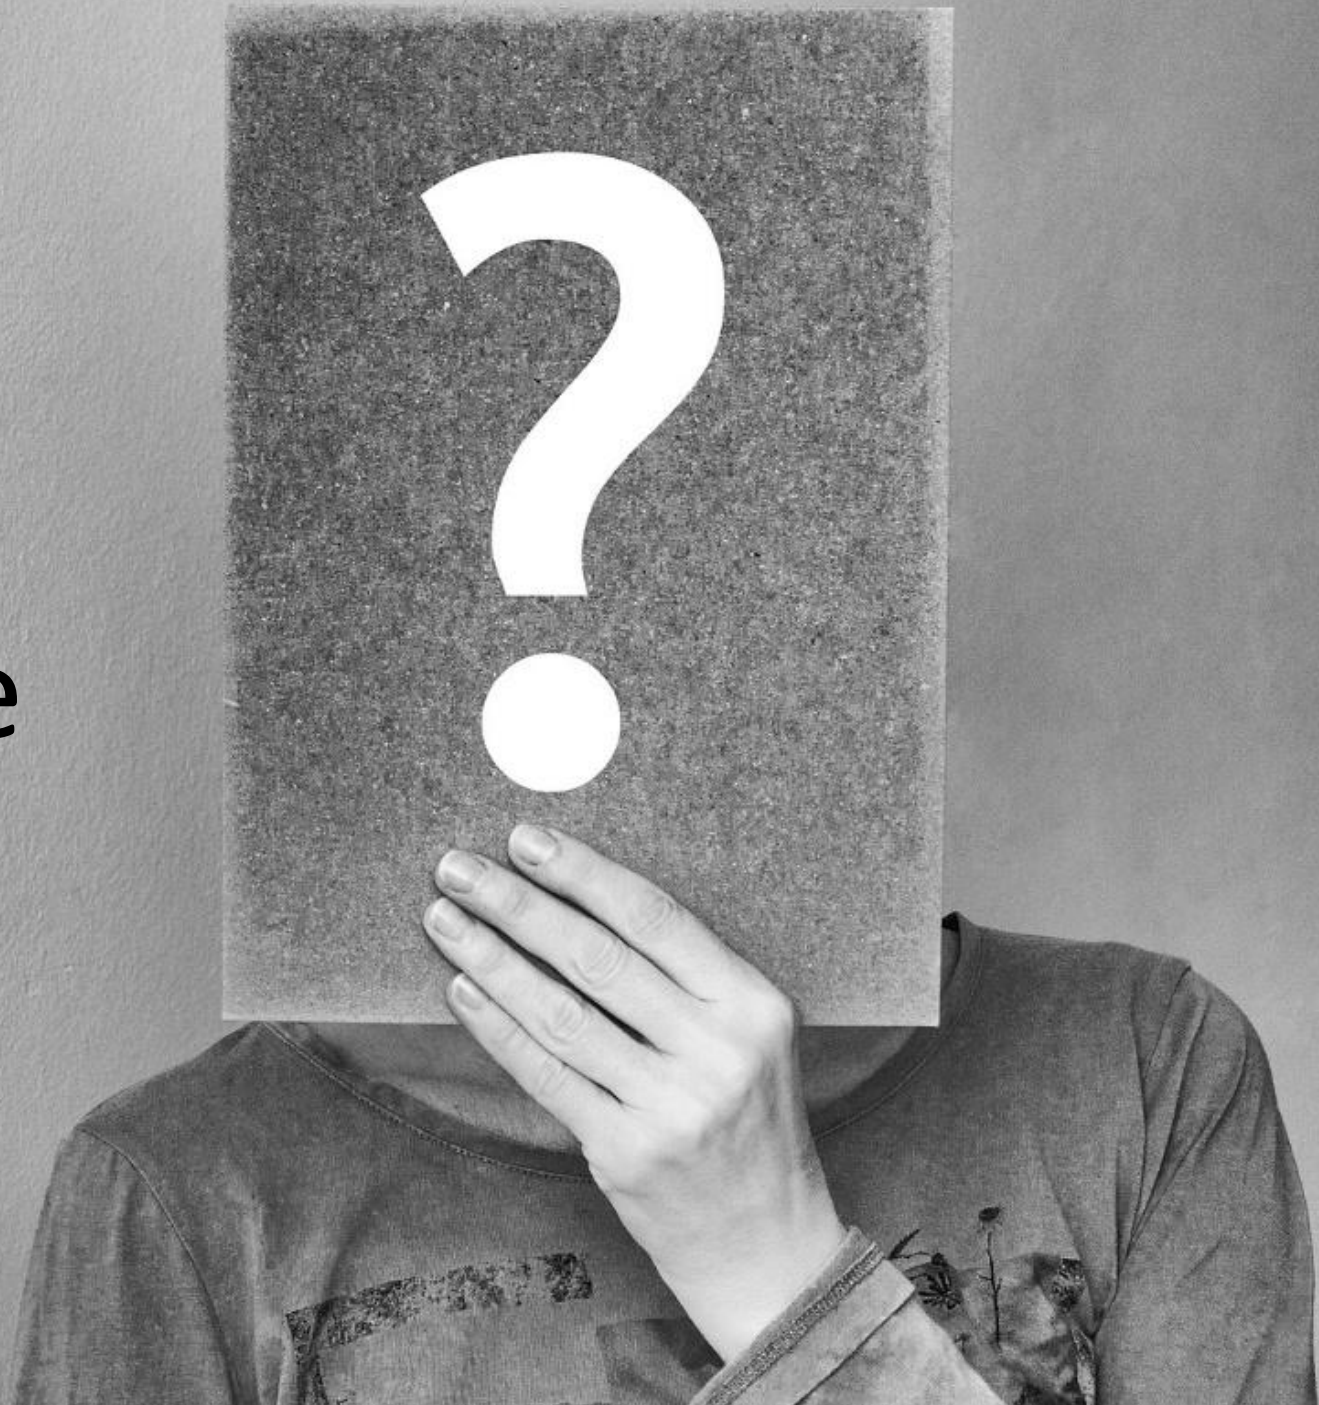

“Creation happens in a digital environment, with an interest in the process, as well as the products, of research and learning. Libraries increasingly support the creation, curation and discoverability of institutional creations (research data, preprints, scholarly profiles, academic profiles, digitized special collections, ...).” Lorcan Dempsey (OCLC Research)

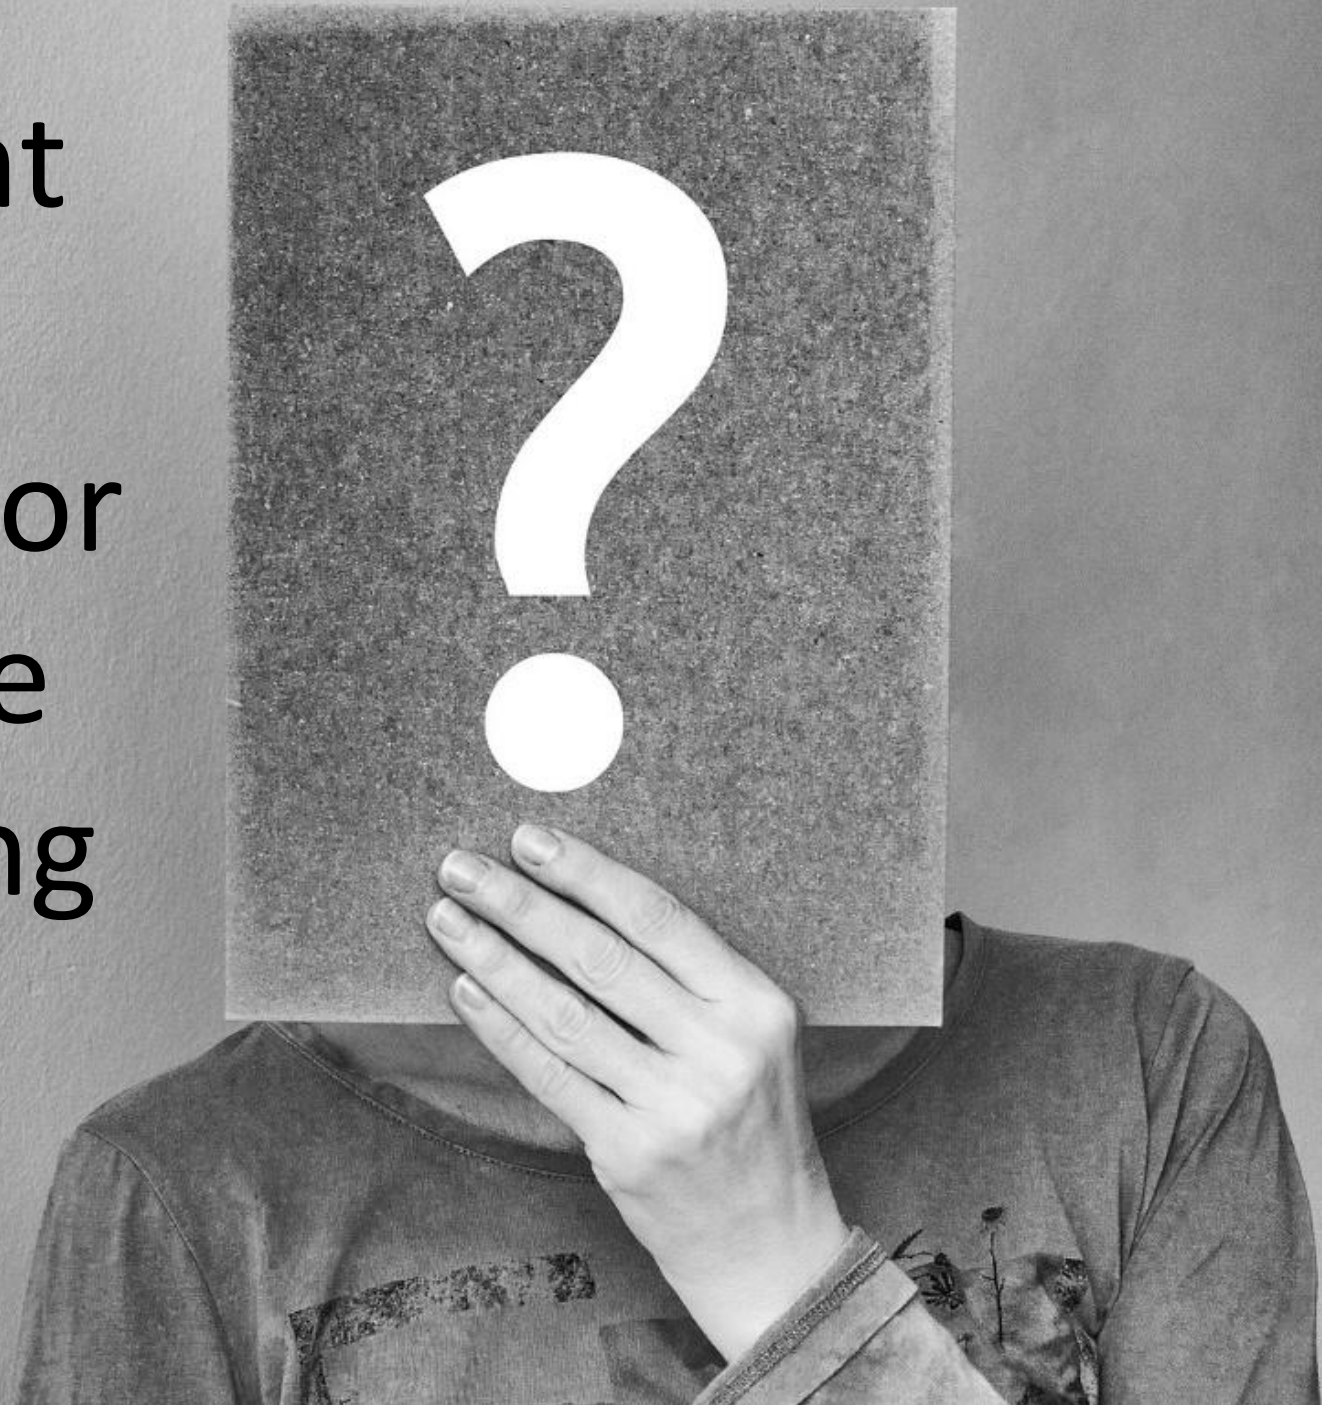

What skills do
inside-out
librarians need?

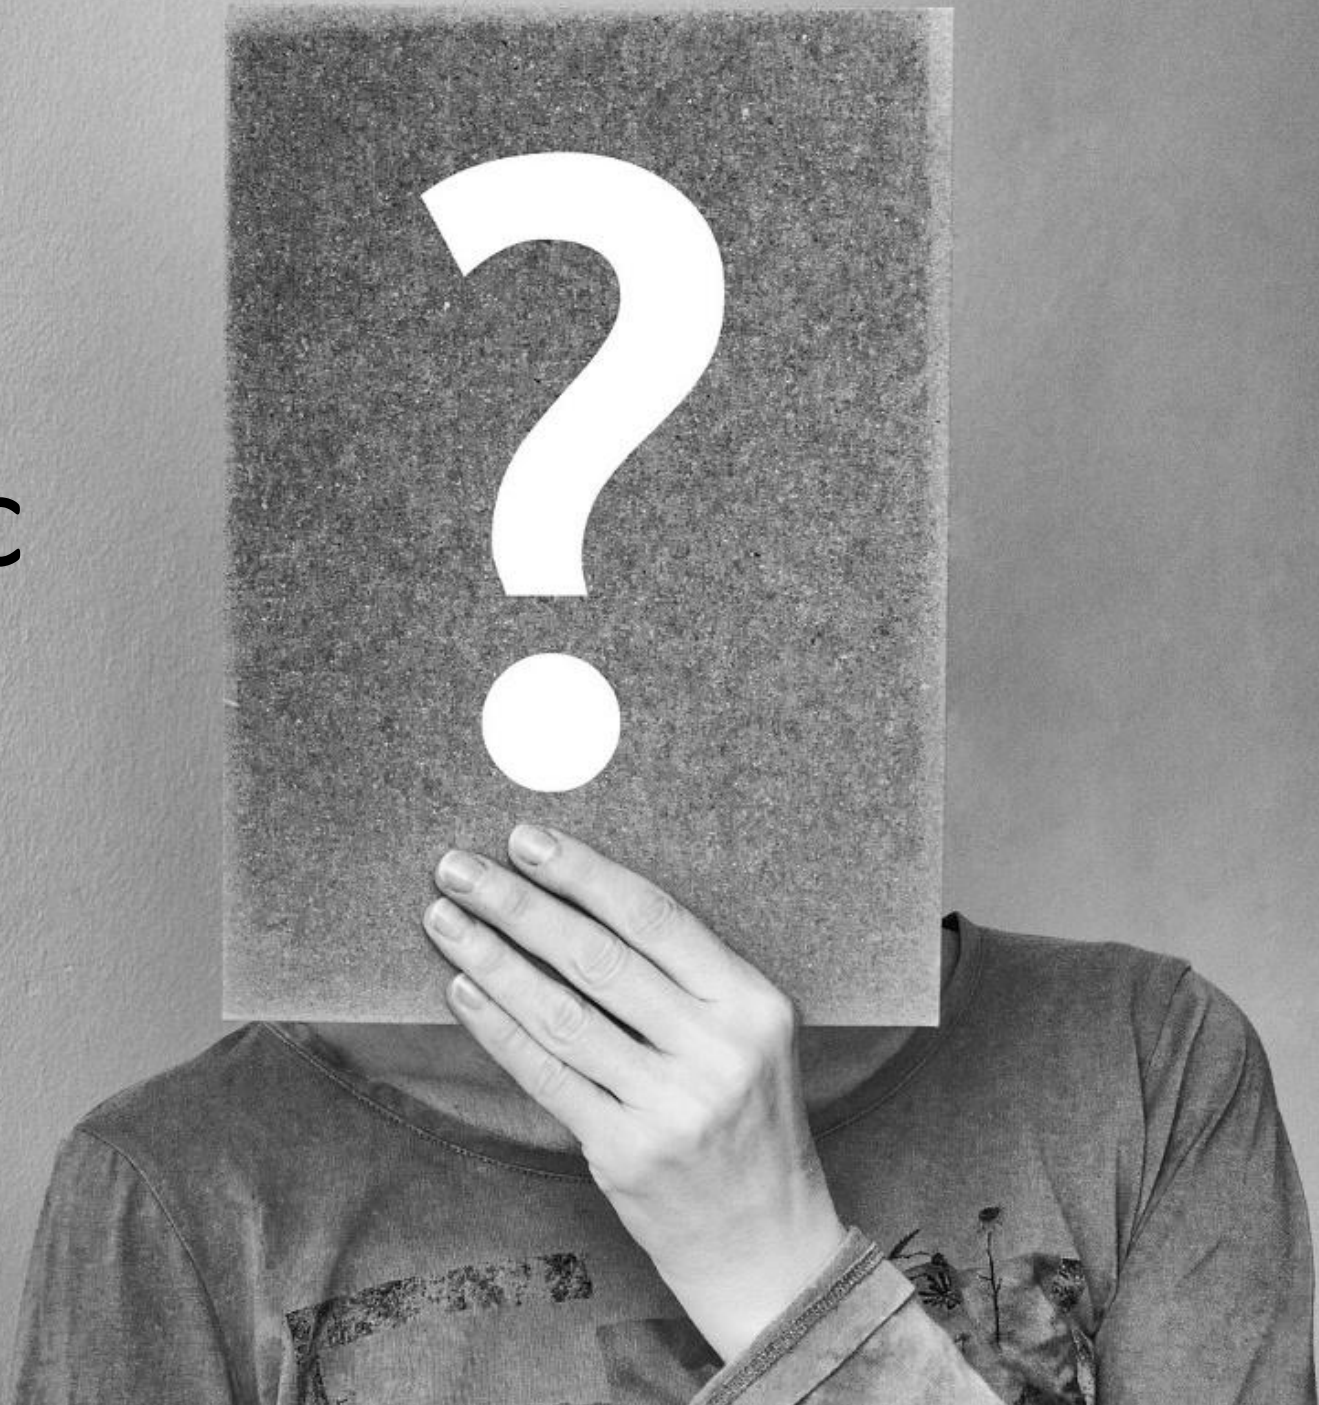

How can
inside-out
librarians acquire
these skills?

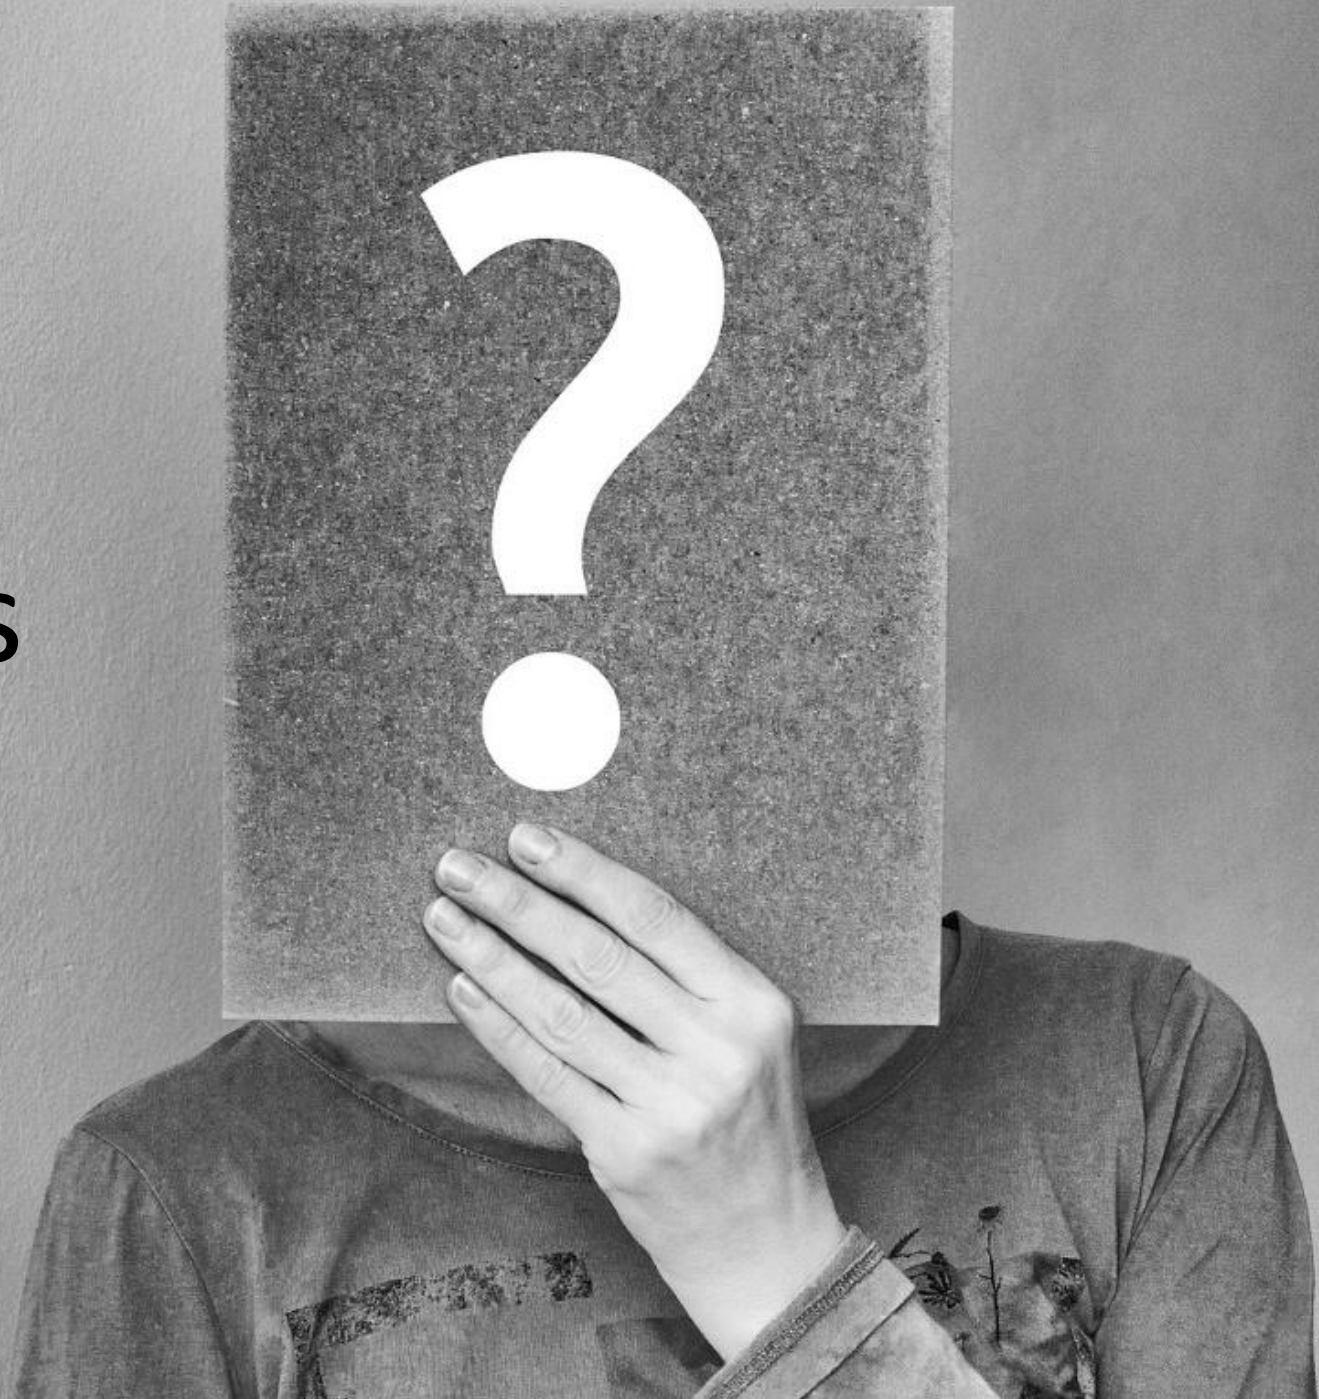

How well do current
formal Library
qualifications (MLIS or
equivalent) prepare
librarians for working
in inside-out
Libraries?

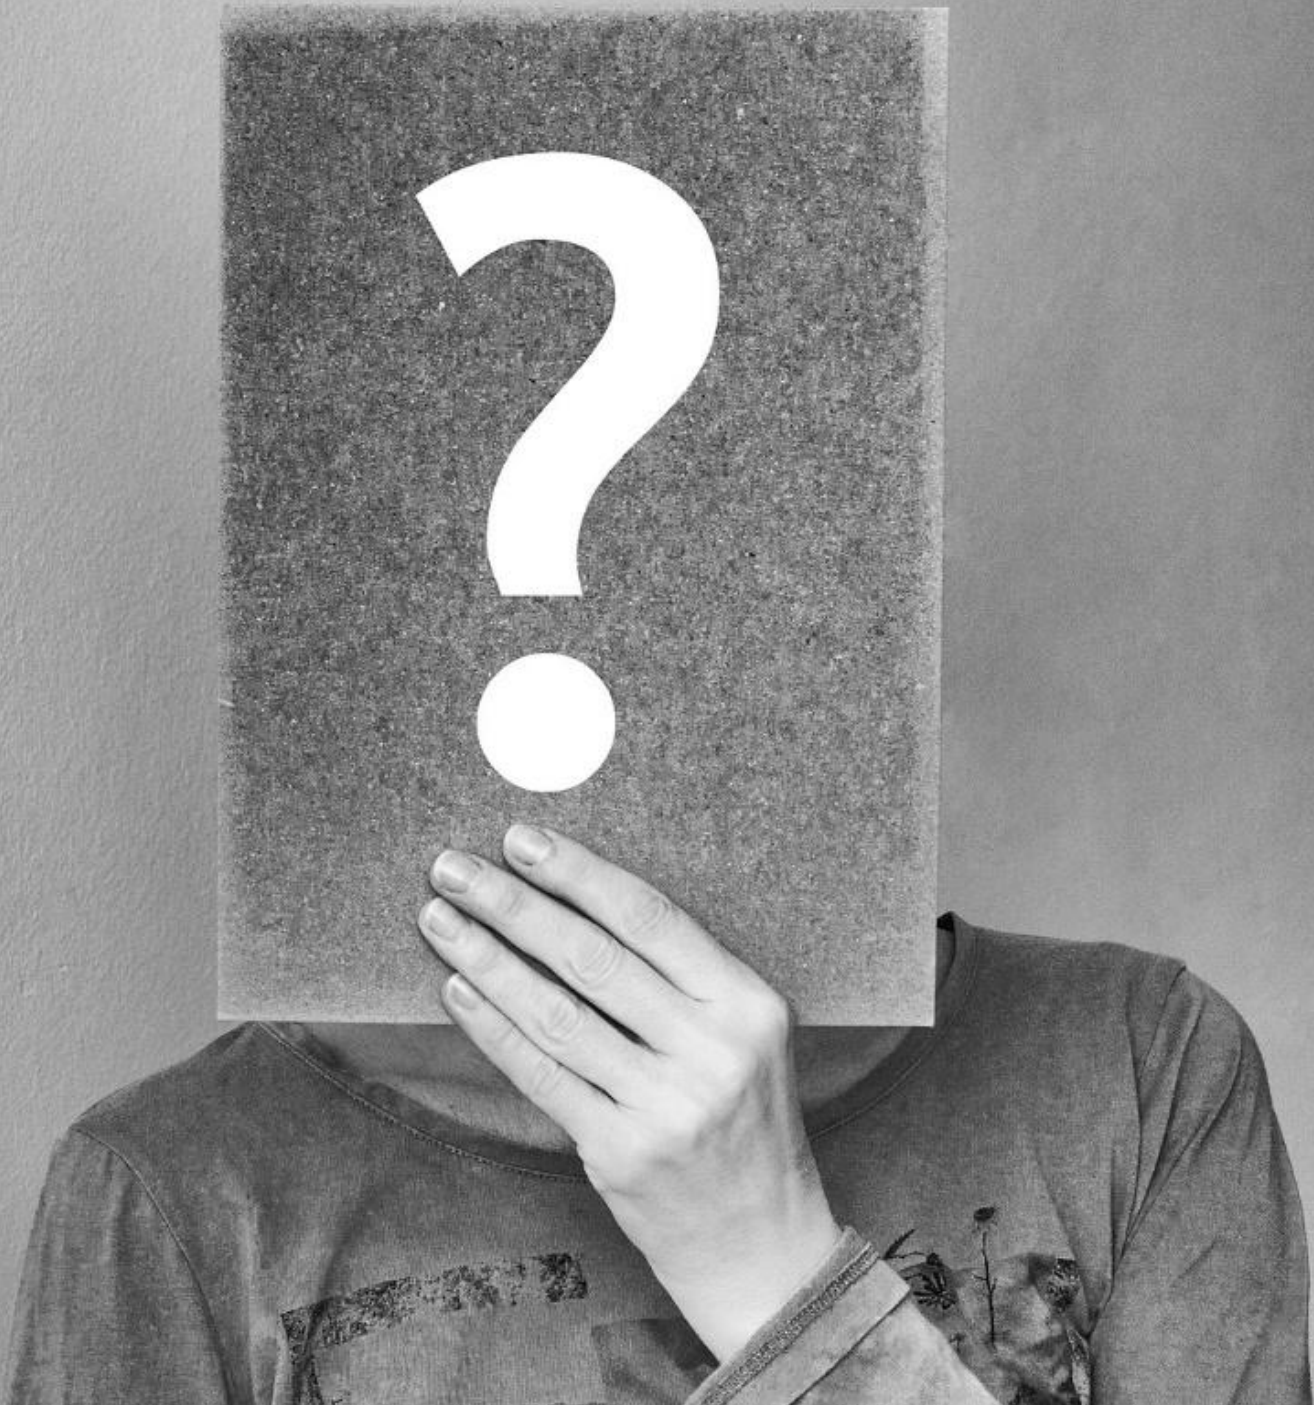

How much
discipline specific
knowledge do
inside-out
librarians need?

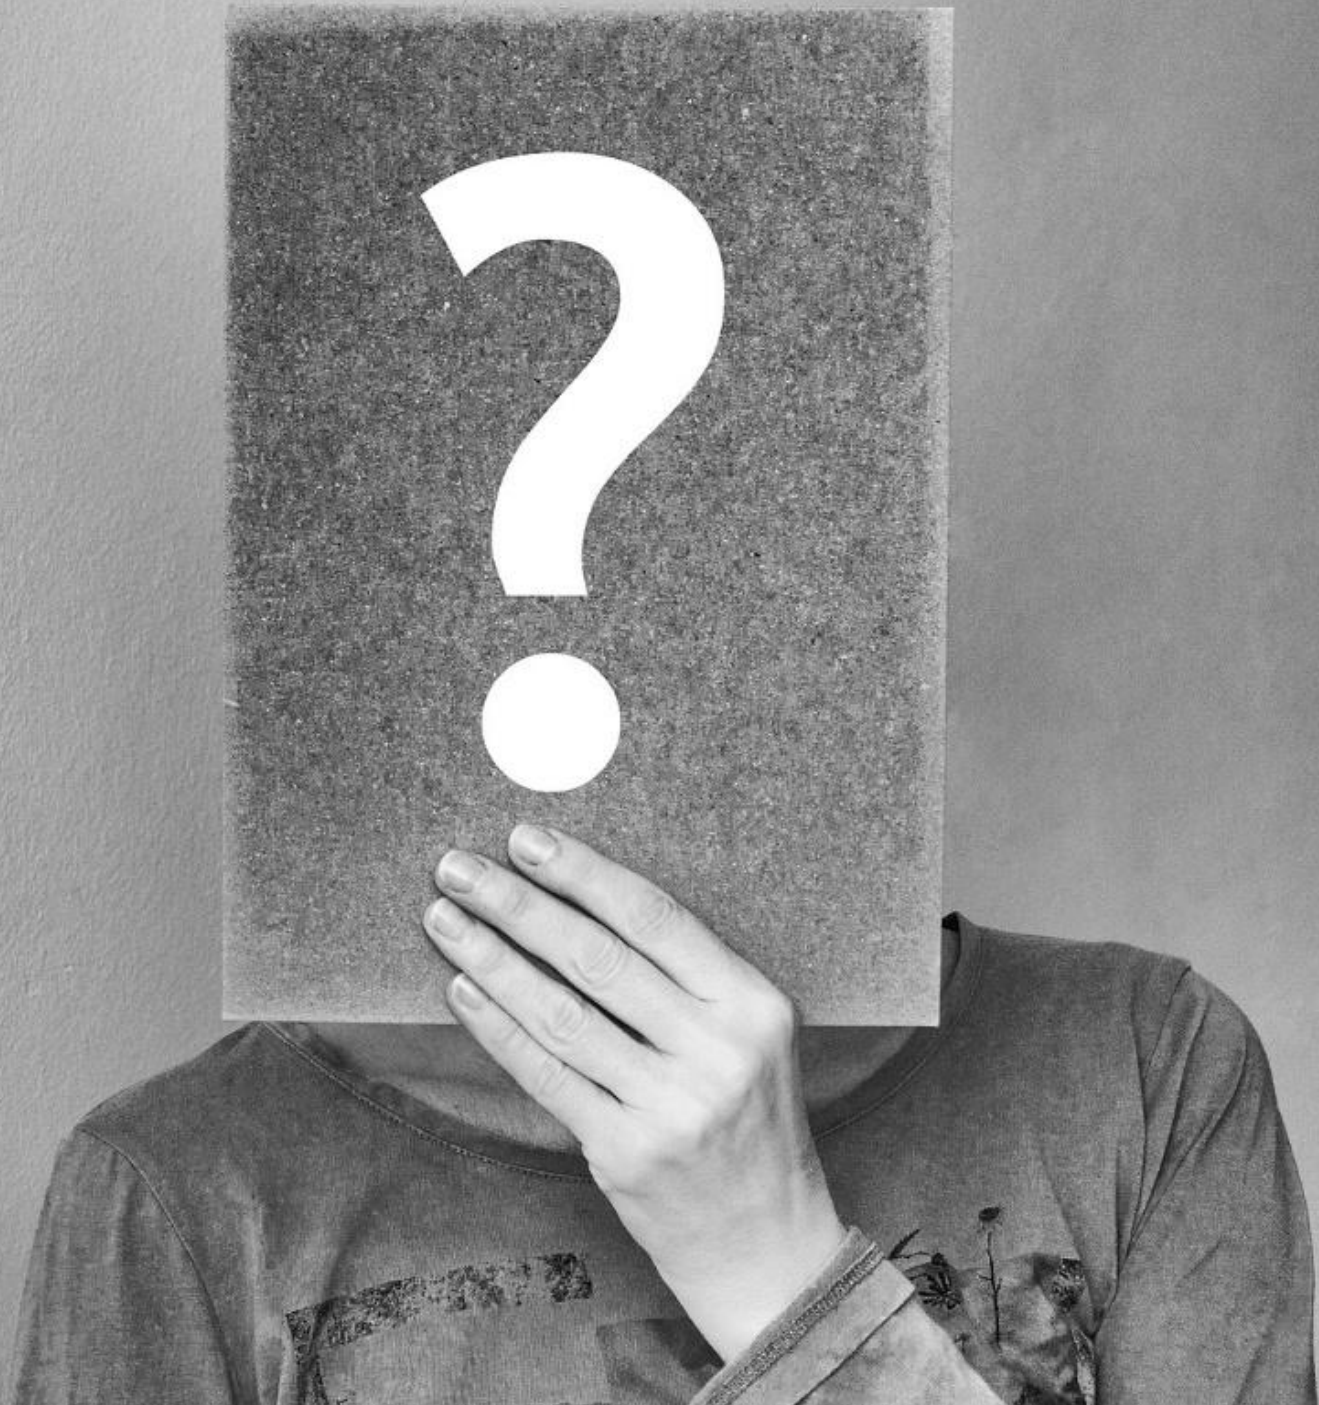

Are attributes
more important
than qualifications
for inside-out
librarians?

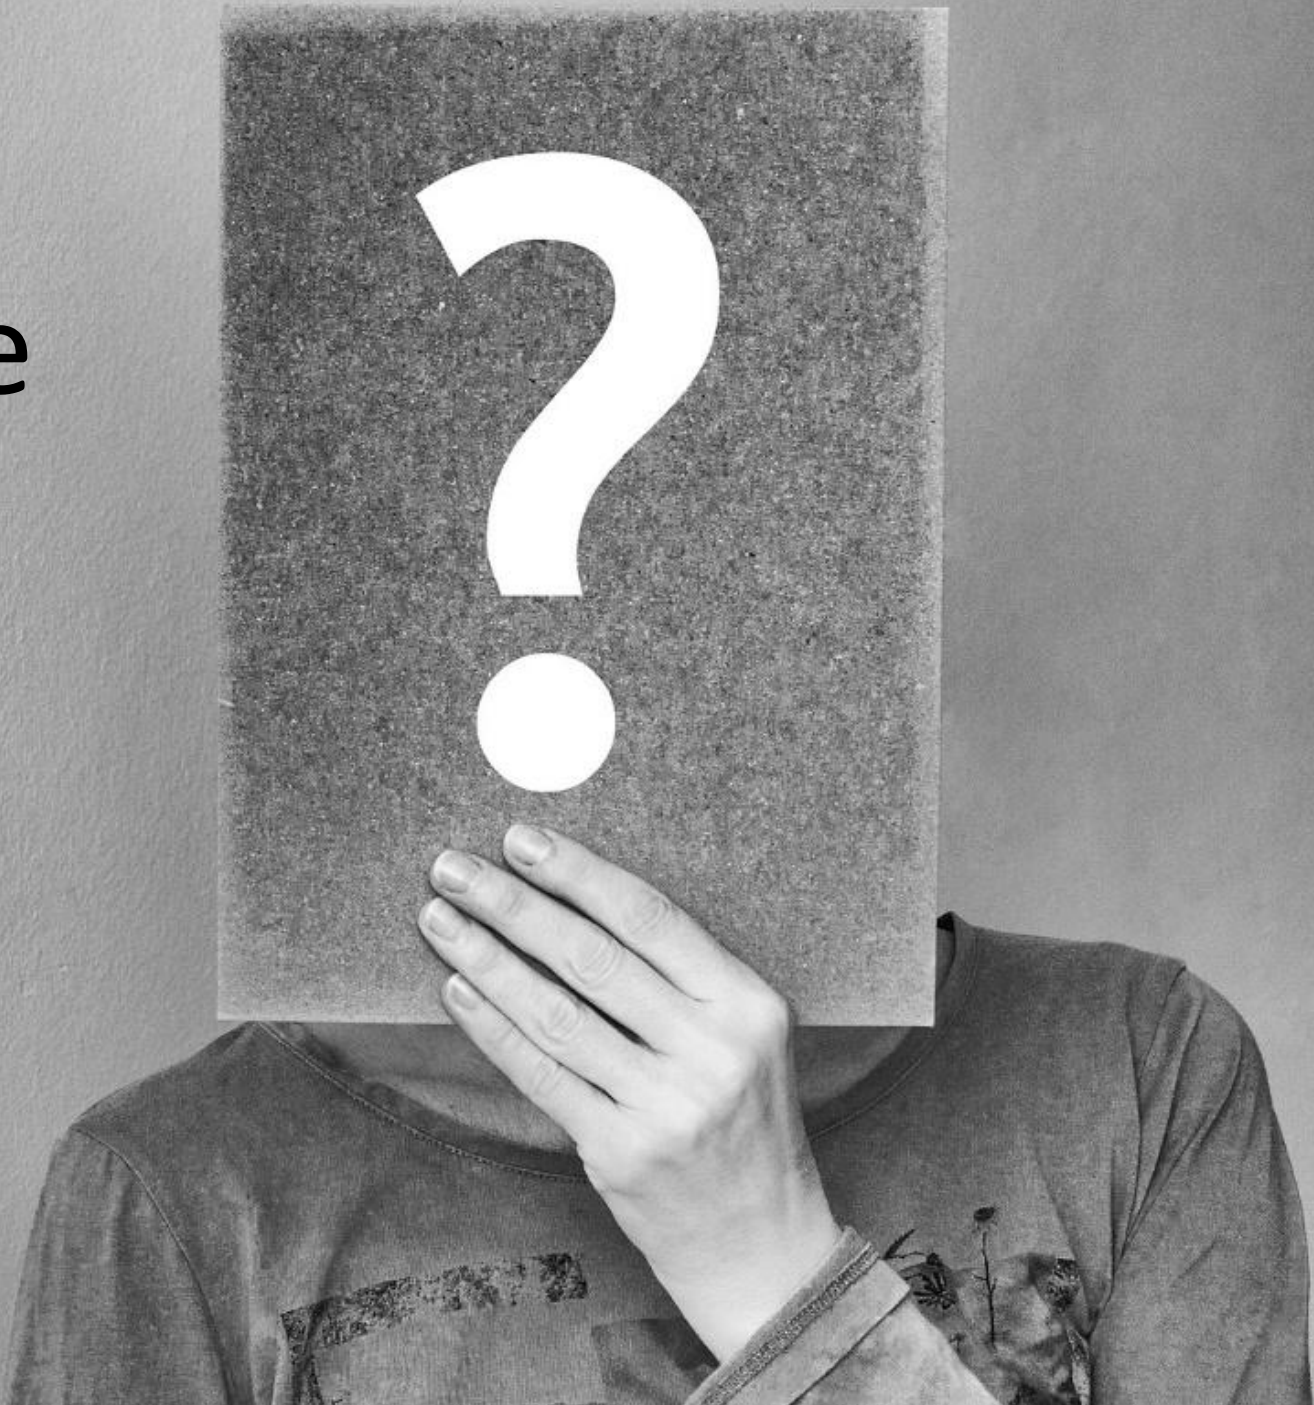

Should inside-out
librarians have
Postgraduate
research
qualifications e.g.
research masters
or above?

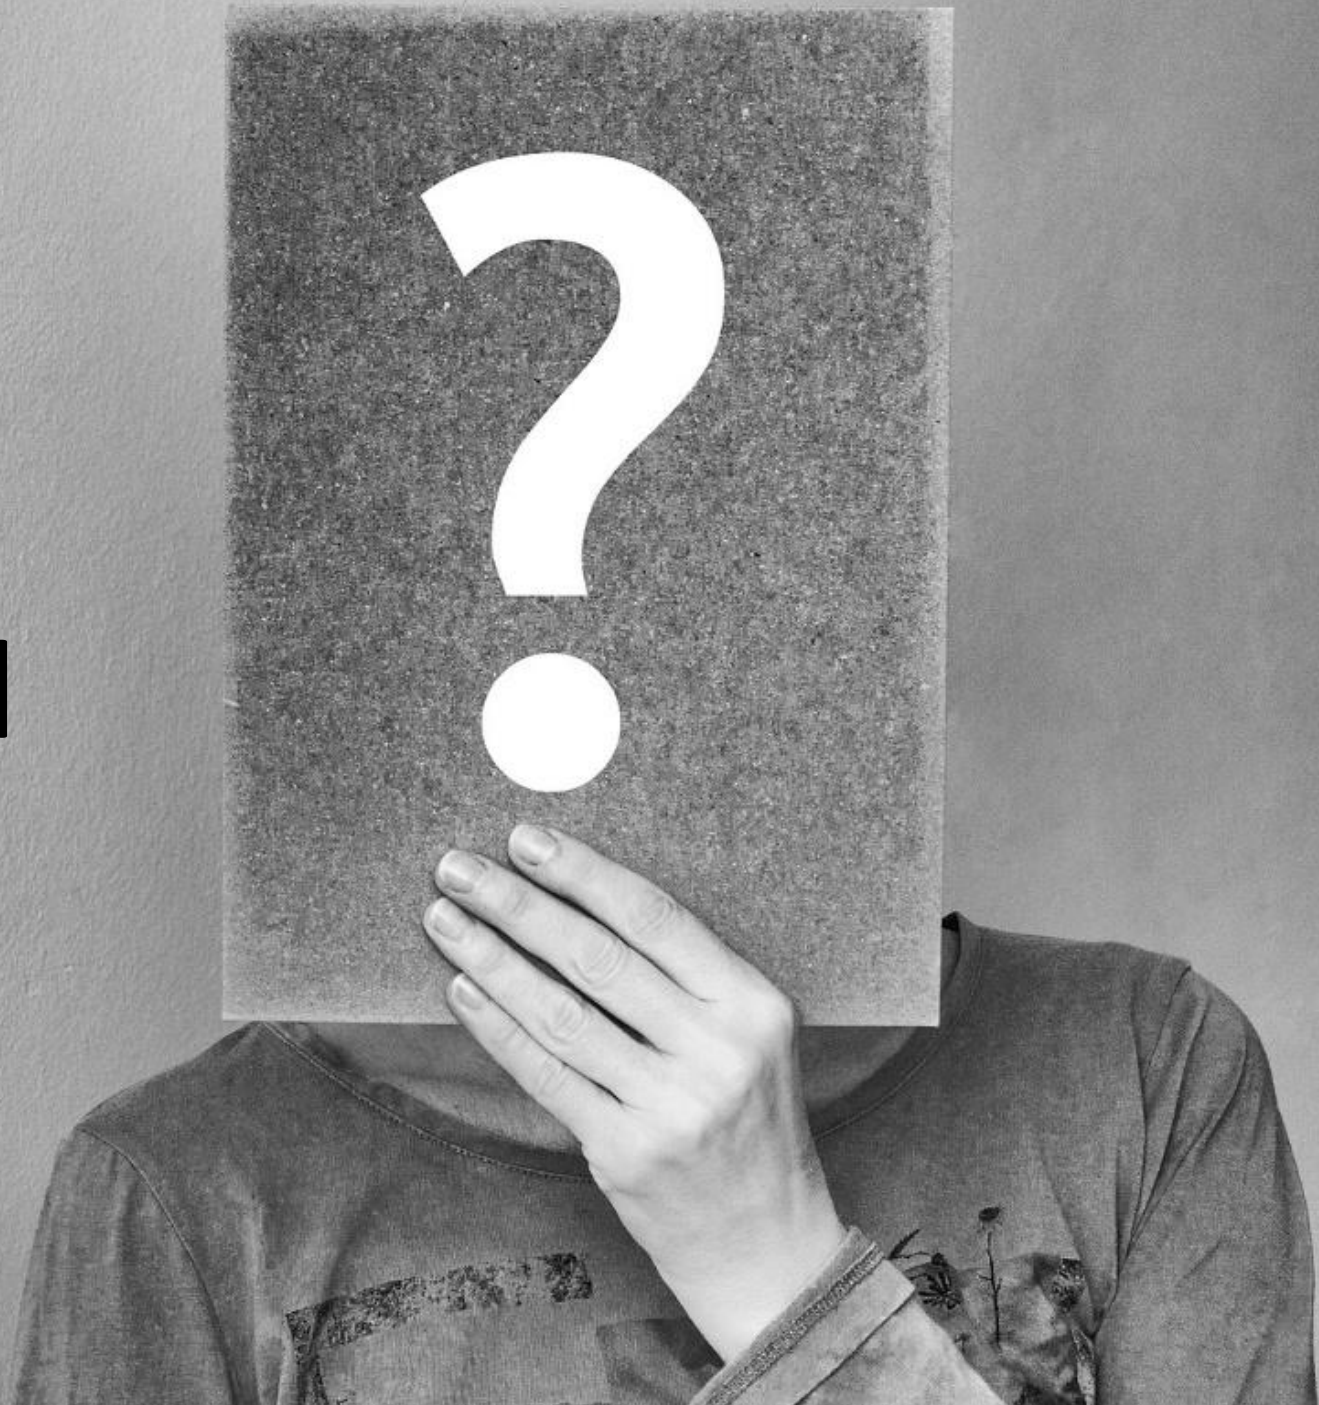

Have library's
outsourced too
many IT tasks and
lost valuable skill
sets within the
profession as a
result?

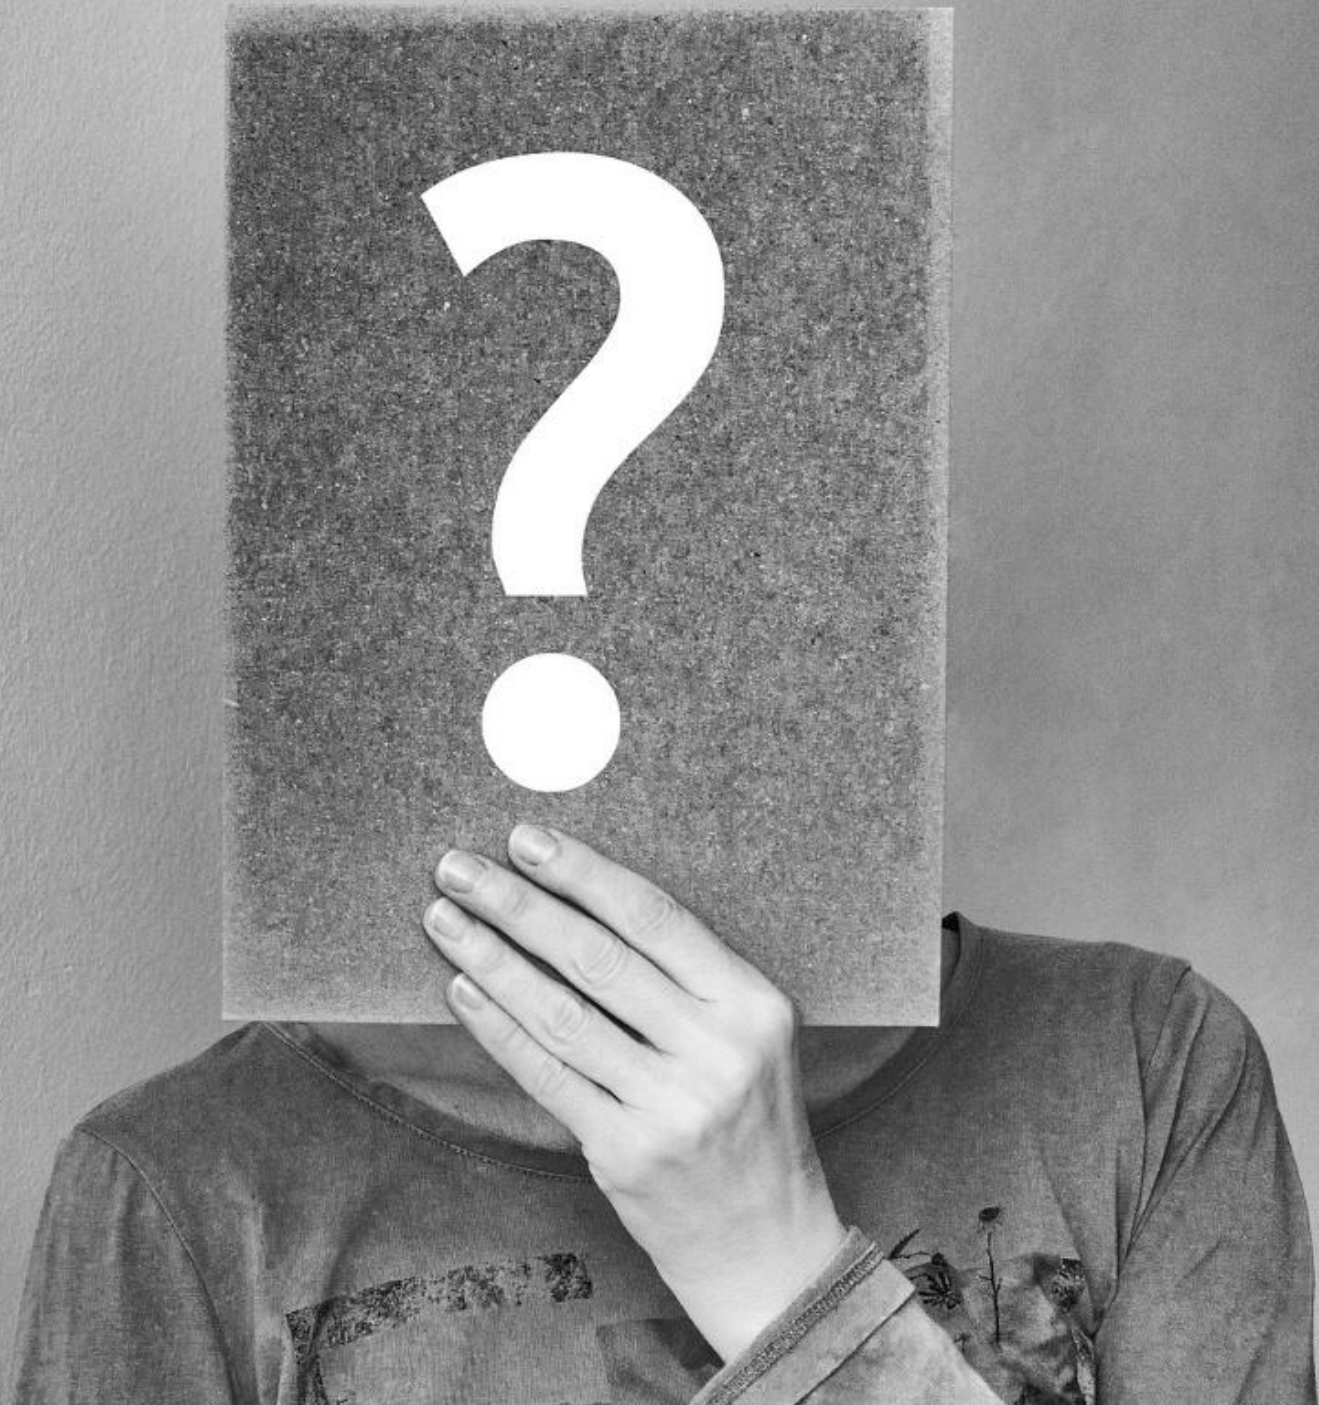

Do we need more
inside-out
librarians with
STEM
backgrounds?

What are
researcher
expectations and
are we able to
meet these?

Are Librarians
alone or are these
questions being
asked by other
research support
units?

Let's talk about this
some more

Join Jo and Shiobhan
for a discussion at
1pm in the
Robert Laidlaw Room

All Welcome
